

THEEGARTEN-PACTEC Announces Gulfpack 2009 Participation

The competence of THEEGARTEN-PACTEC lies in the design and manufacture of individual machines as well as complex systems for the packaging of high-boiled sweets, toffees, chewy candies, chewing gum, chocolates, cube sugar, soup tablets, pastries and also nonfood articles (such as dishwasher and detergent tablets) in various wrapping styles and for different speeds. Wrapping machines and complete packaging lines from

THEEGARTEN-PACTEC enjoy an excellent reputation worldwide for their efficiency, reliability and longevity. Technological leadership is the core competence of THEEGARTEN-PACTEC. Marketing activities are supported by an extensive network of agents all over the world. Currently the company has agents in more than 50 countries. The latest development of THEEGARTEN-PACTEC is the new generation of medium-speed wrapping machines for a variety of different wrapping styles.

The development was driven by the objective to have a machine, which is distinguished by high flexibility with respect to wrapping styles and product sizes. The modular design of these machines will allow the easy conversion to different sizes and shapes as well as different wrapping styles. Thus, cost-intensive down-times can be reduced to a minimum. Depending on the product size and the wrapping style the machines achieves a maximum output of up to 1200 pieces per minute. More complicated styles like single twist (side or top twist) achieve up to 800 products per minute. This new machine generation is available as belt feeding and a plate feeding version.

Cut & wrap technology has been and continues to be one of the THEEGARTEN-PACTEC domains. Extruded and Co - extruded Bubble gum, Chewing gum, Chewy candy, Soft gum, Toffee - with high or low fat

Medium speed continuous motion wrapping machine with belt feeding.

and milk content, with calcium or vitamin. The list of these products seems to be endless. Summing up it can be pointed out that the THEEGARTEN-PACTEC

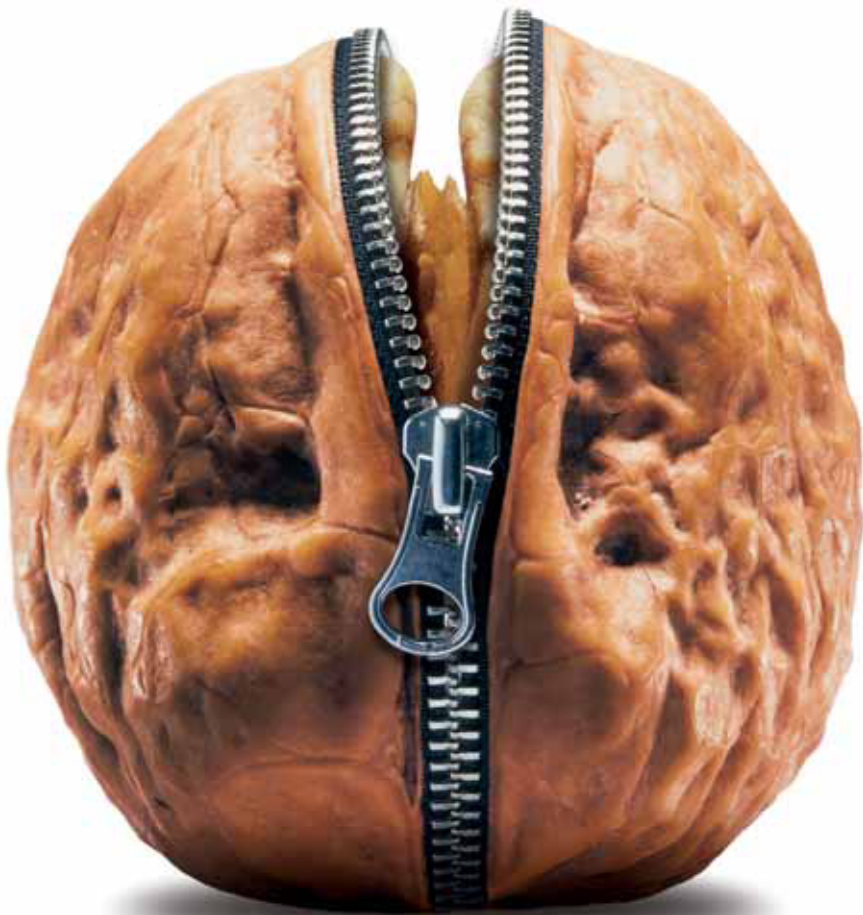

program includes cut & wrap equipment for almost all common wrap styles - either wrapped as single products in fold or twist wrap, flow or stick packs - in three different speed categories - up to 600 ppm, up to 1000 ppm and 1300 + ppm. Longstanding business relations enable THEEGARTEN-PACTEC to offer complete processing and packaging systems in close collaboration with confectioners. So far over 3000 Cut & Wrap machines from THEEGARTEN-PACTEC are installed all over the

world. At Gulf Pack 2009, THEEGARTEN-PACTEC (Booth W602) will present the complete program of wrapping machine via an electronical catalog, including detailed information regarding the latest developments. For more information regarding THEEGARTEN-PACTEC please visit: www.theegarten-pactec.com
